

VECTOR IRIDIUM* DATA LINK (VIDL)

The Vector Iridium Data Link (VIDL) is the heartbeat of the Vector-Tracking and Communications System (V-TACS). VIDL utilizes the Iridium Satellite Constellation for voice and data communications. At only 780 kilometers above Earth, the Iridium Low Earth Orbit (LEO) constellation network provides 100% pole-to-pole coverage of the Earth's surface. Operating in the Iridium LEO network means shorter transmission paths, stronger signals, low latency, and faster registration time than other satellite constellations.

IRIDIUM PTT SERVICE PLANS & TALKGROUP MANAGEMENT

Iridium PTT service plans are exclusive to each VIDL at one flat monthly rate per device. (Prices vary by service provider)

Iridium Talkgroup plans come in small, medium, large, x-large, and jumbo coverage areas.

Talkgroup coverage areas are defined using the Iridium PTT Command Center with drawn circles, squares, and rectangles on a map.

Adding or removing members of a talkgroup does not incur any charges. Updates are instant using the Iridium PTT Command Center portal.

Talkgroups vary in price depending on the number of Iridium PTT devices in the talkgroup.

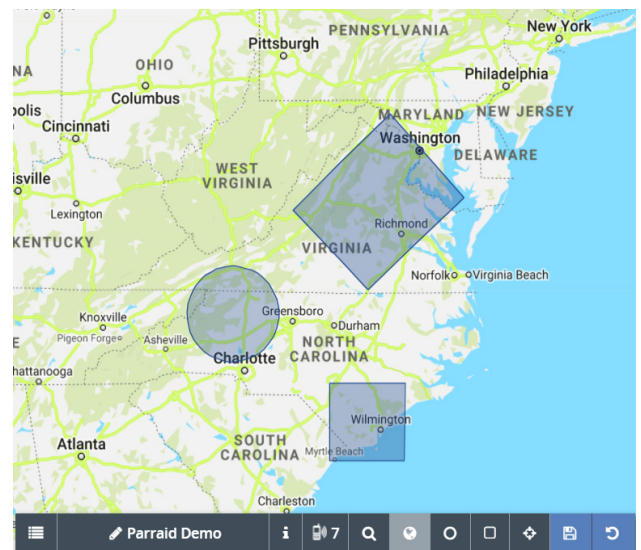

Five Iridium PTT subscriptions (i.e., five VIDLs) include one free, small talkgroup for no extra monthly fee.

Ten Iridium PTT subscriptions include one free medium-talkgroup.

Additional five or ten Iridium PTT subscriptions and additional free small or medium talkgroup, respectively.

The talkgroup sizes below may vary by service provider.

*<http://www.iridium.com>

Talkgroups can be defined in circular or rectangular regions within the Iridium PTT Command Portal. A maximum number of 10 regions (size permitting) can be created within a single talkgroup. The size (talkgroup geographical area) and number of talkgroups allowed is governed by the subscribers Iridium PTT service plan.

Contact us to arrange a plan that makes the most sense for your specific global communication requirements.

Vector Iridium Data Link (VIDL) uses the Iridium Push-To-Talk (PTT) service and provides global coverage with short transmission paths, strong signals, low latency, and shorter registration time than with other satellite systems. Unique to Iridium, this architecture provides inherent advantages in performance and reliability over other mobile satellite services providers.

VIDL Iridium PTT access requires a subscription or airtime plan that can vary in cost based on amount of coverage required. Plans include unlimited Push-To-Talk voice, text and position machine to machine data. SatPhoneStore is Parraid's preferred Iridium PTT service provider.

Device Fees

	Plan A	Plan B	Middle East
Access Fee (Per Device)	\$99/ Month	\$65/ Month	\$99/ Month
Commitment Period	3 Months	12 Months	1 Month
Iridium PTT Calls	Unlimited	Unlimited	Unlimited

Talk Group Options

	Plan A	Plan B	Middle East
Small (100,000 km2)	Free*	Free*	\$400/ Month
Medium (300,000 km2)	Free**	Free**	\$625/ Month
Large (750,000 km2)	\$430/ Month	\$430/ Month	\$1,750/ Month
X-Large(1,500,000 km2)	\$1,000/ Month	\$1,000/ Month	\$4,000/ Month
Jumbo (2,250,000 km2)	\$2,300/ Month	\$2,300/ Month	\$9,200/ Month

- \$50 Activation Fee
- * 1 Free Small Talk Group available per 5 Devices. Normal Fee for Small Talk Group is \$150 per month.
- ** 1 Free Medium Talk Group available per 10 Devices. Normal Fee for Medium Talk Group is \$250 per month.
- Accounts that have any devices operating within a Middle East country must activate devices on Middle East Plan; Middle East Countries: Afghanistan, Bahrain, Eastern Egypt, Iran, Iraq, Israel, Jordan, Lebanon, Oman, Pakistan, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.
- Prices are subject to change without notice.
